Executive Summary 1

الفرصة في سطر واحد

طبقة **Customer Intent Intelligence** لمتاجر سلة — تجيب على السؤال الذي لا يجيب عليه أحد: "ليش الزوار ما اشتروا؟"

الأرقام الأساسية

المقياس	القيمة
(السوق المحتمل) TAM	~50,000 متجر سلة نشط في الخليج (Estimate)
(السوق المستهدف) SAM	~8,000-12,000 متجر ICP (beauty/fashion/perfumes) في الخليج، +2K زيارة شهرية
الهدف خلال 3 (سنوات) SOM	1,500 متجر مدفوع = ~5% من SAM
المستهدف ARPU	(سنة/2,100 SAR) شهر/175 SAR
MRR Target (Year 1)	35,000 SAR (Base case) — 87,500 SAR (Best case)
Break-even Timeline	Month 18 (Base) — Month 12 (Best)
Capital Required	لأشهر 18 الأولى 250,000 - 400,000 SAR

القيمة المحققة للتاجر

Value	Our Solution	Pain Point
يحدد سبب التردد بدقة	Hesitation Capture	لا يعرف ليش الزوار يخرجون
يقلل dead stock بـ 20-30%	Variant Interest	يهدر مخزون على ألوان غير مطلوبة
3-5 توصيات أسبوعية	Product Doctor	كل منتج يحتاج عناية لكن لا يدري أيها
يرفع CVR 15-25%	Intent-driven optimization	ينفق على إعلانات مع conversion ضعيف

Investment Highlights

-  0 منافس مباشر في سلة (مؤكد live)
-  SmartInsight (693 SAR/شهر) مثبت بـ WTP 
-  النموذج مجرّب في (Simplify Exit Survey) Shopify 
-  نافذة 6-12 شهر قبل تراحم الفئة 
-  هامش SaaS عالٍ (~85% gross margin) 
-  Salla App Store distribution منخفض عبر CAC 

2. Business Opportunity & Market

2.1 حجم السوق

كقاعدة Salla:

- متجر نشط على سلة في 2026 +50,000 (Estimate)
- نمو سنوي ~30-40% (السوق الخليجي في توسع)
- ~30% من المتاجر تتجاوز 2,000 زيارة شهرية (ICP threshold)
- ~40% من تلك في verticals مستهدفة (beauty, fashion, perfumes, gifts)

حسابات السوق:

50,000 30 × متجر (ICP threshold يتجاوز) × 40% (verticals مناسبة)
الأولي SAM = متجر 6,000 =

نمو السوق 30% سنويًا = 7,800 (سنة 2)، 10,140 (سنة 3)

Market Segments 2.2

Segment 1: "Painful Pre-Purchase Loss" (Primary)

- شهر إعلانات/SAR ينفق 15-30، CVR 1-3%، زيارة/شهر 25K-30K
- شهر/شهر SAR ~1,000 = CVR عالي جدًا — كل 1% تحسن **Pain Level:**
- شهر مقبول/SAR عالي — 200-350 **WTP:**
- **حجم:** 30% من SAM = 1,800-2,500 متجر

"Segment 2: "Inventory Decision Makers

- Fashion/Beauty مع variants كثيرة
- زيارة/شهر 5K-30K
- متوسط-عالي — مخزون ميت مشكلة حقيقية **Pain Level:**
- SAR متوسط — 99-199 **WTP:**
- **حجم:** 40% من SAM = 2,400-3,200 متجر

"Segment 3: "Curious Optimizers

- مرشانت متقدم، يجرب أدوات
- زيارة/شهر 10K+
- منخفض-متوسط **Pain Level:**
- SAR متوسط — 99 **WTP:**
- **حجم:** 20% = 1,800-1,200 متجر

"Segment 4: "Out of ICP

- متاجر >2K زيارة، أو verticals غير مناسبة
- عدم استهداف في السنة الأولى **Strategy:**
- **حجم:** المتبقي من سلة

2.3 Trends المؤيدة

1. ارتفاع تكلفة الإعلانات في الخليج — كل تاجر يبحث عن CVR، ليس traffic إضافي
2. نضوج المرشانت السعودي — أصبح data-literate، يفهم insights
3. متوافقة tools فرصة لـ consent — يُجبر التجار على ميكنة جمع PDPL
4. (يفتح السوق لنا) intelligence يدل على وعي بحاجة — Smart Analytics يستثمر في Salla
5. hype يقدم ذلك بدون Doctor، "المرشانت يطلب" أدوات ذكية — AI hype

2.4 Window of Opportunity

الفترة	السيناريو
الآن - 6 شهور	0 منافس مباشر، فرصة first-mover
6-12 شهر	احتمال دخول 1-2 منافس (SmartInsight يوسع، أو Shopify app ينقل)
12-18 شهر	فئة تبدأ تتشكل، الـ moat يحتاج depth
+18 شهر	السوق ينضج، المنافسة على الجودة والاعتمادية

3. Business Model Canvas

Customer Segments

- **Primary:** شهر، تنفق على إعلانات/2K-30K visits، Salla متاجر Beauty/Perfumes/Fashion
- **Secondary:** variants متاجر متعددة الـ (inventory intelligence يحتاجون)
- **Tertiary:** data-literate المتاجر المتقدمة (early adopters)

Value Propositions

- "أعرف ليش زوارك ما اشتروا — على مستوى كل منتج"
- "توصيات أسبوعية قابلة للتطبيق 5 Product Doctor"
- "قرّر مخزونك بناءً على طلب حقيقي Multi-Variant Interest"

"Salla-native، متوافق مع PDPL عربي،"

Channels

- 1. **Salla App Store** (Primary — 60% of acquisition)
- 2. **Content marketing** (Arabic SEO، LinkedIn، Twitter) — 20%
- 3. **Partnerships** (Salla certified agencies، Salla Champions) — 10%
- 4. **Direct outreach** (top Salla merchants in target verticals) — 10%

Customer Relationships

- **Self-service** Starter، Growth plans (ل 80% من المتاجر)
- **High-touch onboarding** Pro tier (واتساب + Zoom call)
- **Community** (Discord/Slack للمتاجر المستخدمين)
- **Weekly digest email** engagement للحفاظ على

Revenue Streams

- 1. **SaaS Subscriptions** (من الإيرادات 95%):
 - Starter: 99 SAR/شهر
 - Growth: 199 SAR/شهر
 - Pro: 349 SAR/شهر
- 2. **Annual Plans** (-15% discount، يحسّن cash flow)
- 3. **Add-ons** (Year 2+):
 - WhatsApp credits pack
 - Premium Doctor rules
 - Custom verticals templates

Key Resources

- منتج (codebase، infrastructure) SaaS
- بيانات intent المجمعة (data moat with time)
- العلاقة مع سلة (preferred partner status)

Brand & content library	•
Key Activities	
تطوير منتج	•
خدمة العملاء (ال retention الأهم)	•
Content marketing (Arabic SEO)	•
Salla App Store optimization	•
Doctor rules engineering (يتطور باستمرار)	•
Key Partnerships	
Salla (most critical — App Store partnership)	•
WhatsApp Business BSP (Wati, Twilio, أو مماثل)	•
Unifonic (SMS Saudi-focused)	•
Salla Certified Agencies (referral partners)	•
AWS Riyadh (hosting + PDPL compliance)	•
Cost Structure	
شهري (Year 1 base):	
Hosting (AWS Riyadh): ~3,000 SAR	•
WhatsApp/SMS: ~2,000 SAR (variable based on volume)	•
Tools (Linear, Notion, Figma, Sentry, etc.): ~2,500 SAR	•
Email (SendGrid): ~500 SAR	•
Legal/Accounting: ~3,000 SAR	•
Marketing: ~5,000-15,000 SAR (variable)	•
Total Fixed: ~16,000 SAR/شهر minimum	•
Founders' salaries (Year 1):	
Founder #1 (Product/Eng): minimal/equity	•
Founder #2 (Business/Sales): minimal/equity	•
Reduced personal expenses during runway	•

One-time costs:

Legal setup + IP: ~15,000 SAR

Brand + Design: ~10,000 SAR

Initial development tools: ~5,000 SAR

Pricing Strategy & Tiers 4

Pricing Philosophy 4.1

القواعد:

1. لا تنافس على السعر — السعر إشارة قيمة (signal). أرخص = أقل قيمة.
2. Per store, not per user — بسيط للمرشانت
3. Submissions-based limits — القيمة الحقيقية metric
4. Free trial 14 يوم بدون credit card — يقلل friction
5. لا freemium دائم — يقتل التفعيل ويعطي signal خاطئ

Pricing Tiers (Detailed) 4.2

Starter Plan — 99 SAR / month 🌱

لمن: متاجر صغيرة، أول مرة يجرب الفئة، >3K visits/month حدود:

- (فقط Interest أو Hesitation) 1 widget نشط
- 100 submissions/شهر
- Dashboard أساسي (top 3 reasons, products list)
- لا Product Doctor (يحتاج Growth)
- لا WhatsApp notifications (Email/SMS فقط)
- أسبوعي Email digest
- Support: Email (ساعة 48)

Anchor: "أرخص من فنجان قهوة يوميًا"

(Recommended badge — الأكثر شعبية) Growth Plan — 199 SAR / month 🚀

لمن: ال ICP الأساسي — 3K-25K visits، vertical مناسب حدود:

- 5 widgets نشطة
- 500 submissions/شهر
- Full Dashboard + Variant Heatmap
- Product Doctor (5 rules MVP)
- مدمجة WhatsApp notifications
- Weekly digest + alerts
- Export submissions (CSV)
- Support: Email + WhatsApp (ساعة 24)

Anchor: "بـ 0.3% فقط، يدفع نفسه عدة مرات CVR إذا حسن"

Pro Plan — 349 SAR / month 💎

لمن: متاجر متقدمة، 25K+ visits، multi-vertical حدود:

- غير محدودة Widgets
- غير محدودة Submissions
- Product Doctor + Custom rules (Year 2)
- WhatsApp + SMS (BSP ضمن قواعد) غير محدود
- Multi-store support (Year 2)
- API access (Year 2)
- Priority support: WhatsApp (ساعات 4)
- Quarterly review call مع founder

Anchor: "analyst part-time أرخص من تعيين"

Annual Pricing (Discount Strategy) 4.3

Savings	Annual Total	Annual (per month)	Monthly	Plan
180 SAR	1,008	84	99	Starter
360 SAR	2,028	169	199	Growth
624 SAR	3,564	297	349	Pro

Logic:

- 15% off annual
- Cash flow upfront (DSO يقلل)
- churn (sunk cost effect) يقلل
- vehicle for upselling يعطي

Free Trial Strategy 4.4

14-day trial. full Growth features:

- لا credit card مطلوبة (يزيد top-of-funnel)
- يومي (Day 1, 3, 7, 10, 13) email touch points
- المكتسبة insights ال tour + conversion عرض: Day 14
- بعد انتهاء 30 trial: read-only access يوم (يحفظ بياناتهم)

معدل التحويل المستهدف:

- Trial start → Activation (first widget): 80%
- Activation → 10 submissions: 60%
- Trial → Paid: 15%
- (Best case: 20% if onboarding excellent)

Pricing Evolution Roadmap 4.5

Year 1 (Months 1-12):

- ثلاث خطط فقط (Starter/Growth/Pro)

- add-ons لا
- custom plans لا

Year 2 (Months 13-24):

- إضافة Annual plans

Add-ons:

- ☐ +50 SAR: WhatsApp credit boost
- ☐ +99 SAR: Custom Doctor rules
- Volume discount J multi-store (5+ stores)

Year 3+ (Months 25+):

- Enterprise tier (negotiable, 999+ SAR/شهر)
- API tier للوكالات
- White-label option

Discount Strategy (Disciplined) 4.6

متى تخصم:

- ☒ Beta merchants (first 30 days free → 50% for first 6 months)
- ☒ Annual prepay (-15%)
- ☒ Salla Champion referral (3 months -25%)
- ☒ Salla partnership promo (joint announcement)

متى لا تخصم:

- ☒ End-of-month deals
- ☒ Random "20% off"
- ☒ Negotiation with merchants who push back
- ☒ Black Friday / White Friday (نحن SaaS، ليس retail)

Reasoning: خطأ signal ويرسل future pricing changes يصعب discount كل.

Revenue Projections (3 Scenarios) .5

Best Case Scenario 5.1

فرضيات:

- نجاح Salla App Store listing
- vertical تنتشر في الـ 3 case studies
- شراكة مع Salla Certified Agency 2
- Trial-to-paid: 20%
- 30-day retention: 80%
- شهر/ARPU: 185 SAR

شهر بشهر (مدفوعين):

Month 1:	3 paid	—	555 SAR MRR
Month 3:	25 paid	—	4,625 SAR
Month 6:	85 paid	—	15,725 SAR
Month 9:	220 paid	—	40,700 SAR
Month 12:	500 paid	—	92,500 SAR

Year 1 Revenue: ~480,000 SAR **Year 2 Revenue:** ~2,100,000 SAR (1,500 paid by EOY2) **Year 3 Revenue:** ~5,200,000 SAR (3,500 paid)

Base Case Scenario 5.2

فرضيات:

- نجاح متوسط في App Store
- مؤثر 1 case study
- لا شراكة agency في السنة الأولى
- Trial-to-paid: 15%
- 30-day retention: 70%
- شهر/ARPU: 175 SAR

شهر بشهر:

Month 1:	2 paid	—	350 SAR MRR
Month 3:	12 paid	—	2,100 SAR
Month 6:	40 paid	—	7,000 SAR
Month 9:	95 paid	—	16,625 SAR
Month 12:	200 paid	—	35,000 SAR

Year 1 Revenue: ~190,000 SAR **Year 2 Revenue:** ~870,000 SAR (650 paid by EOY2) **Year 3 Revenue:** ~2,100,000 SAR (1,500 paid)

Worst Case Scenario (Kill criteria threshold) 5.3

فرضيات:

- ضعف في (<2%) submission rate
- صعوبة في explain القيمة للمرشانت
- Trial-to-paid: 8%
- 30-day retention: 50%
- ARPU: 140 SAR/شهر

شهر بشهر:

Month 1:	1 paid	—	140 SAR MRR
Month 3:	4 paid	—	560 SAR
Month 6:	12 paid	—	1,680 SAR
Month 9:	25 paid	—	3,500 SAR
Month 12:	50 paid	—	7,000 SAR

Year 1 Revenue: ~40,000 SAR

Kill Decision Point (Month 6):

- إذا <15 paid customers و **Pivot** → submission rate <1.5% أو **wind down**

Sensitivity Analysis 5.4

العامل	تأثير 10% تحسين على Year 1 MRR
Trial sign-ups	+12% (linear)
Trial-to-paid conversion	+10%
30-day retention	+18%
ARPU	+10%
Salla App Store ranking	+25% (nonlinear — top 3 يضاعف distribution)

Insight: engagement (weekly digest, Doctor recs). ال retention يحتاج أهم عاملين. ال retention وال App Store ranking ال ranking يحتاج reviews + features الجديدة.

Unit Economics .6

CAC (Customer Acquisition Cost) 6.1

Channel Mix (Base Case Year 1):

القناة	% من الـ acquisition	CAC	السبب
Salla App Store (organic)	50%	0-50 SAR	فقط listing + SEO
Content marketing	25%	100-200 SAR	blog + LinkedIn + Twitter
Direct outreach	15%	200-400 SAR	founder-led. high-quality
Paid ads (Salla mention)	5%	300-500 SAR	tested in Month 4+
Partnerships	5%	100 SAR (referral fee)	agency referrals

Blended CAC: ~150 SAR (Year 1 Base)

LTV (Lifetime Value) 6.2

فرضيات (Base case):

- Monthly churn: 5% (الناجح SaaS متوسط للـ)
- Average lifetime: $1 / 0.05 = 20$ شهر
- ARPU: 175 SAR/شهر
- Gross margin: 85% (SaaS standard)

$$\text{LTV} = \text{ARPU} \times \text{Lifetime} \times \text{Gross Margin} \quad \text{LTV} = 175 \times 20 \times 0.85 = 2,975 \text{ SAR}$$

LTV : CAC Ratio 6.3

Base Case: $2,975 / 150 = 19.8 : 1$ ✅ (الـ benchmark الجيد لـ SaaS: 3:1+, 5:1 (الممتاز: 5:1+))

Best Case: 23 : 1 **Worst Case:** 8 : 1 (لا يزال صحي)

Payback Period 6.4

$$\text{ARPU} \times \text{Gross Margin} = \text{الـ recurring profit} \quad 149 = 0.85 \times 175 \text{ SAR/الشهري}$$

Payback = CAC / Monthly Profit = 150 / 149 = ~1 شهر  (ال benchmark: الممتاز: >12 شهر، الجيد: >6 شهر)

Cohort Retention (Target) 6.5

Best Retention	Base Retention	Cohort Age
80%	70%	Month 1 (post-trial)
72%	60%	Month 3
65%	50%	Month 6
55%	40%	Month 12
45%	30%	Month 24

Net Revenue Retention (Year 2 target): 110-120% (expansion via tier upgrades + add-ons
يعوض churn)

Cost Structure .7

Year 1 Cost Breakdown (Base Case) 7.1

(شهري) Fixed Costs

Month 10-12	Month 7-9	Month 4-6	Month 1-3	البند
5,000	3,500	2,500	1,500	Hosting (AWS Riyadh)
2,500	1,500	800	500	Email/SMS infrastructure
3,500	3,000	2,500	2,500	Tools (dev + business)
3,000	2,500	2,000	2,000	Legal/Accounting
1,500	1,000	500	500	Office/utilities (home-based first)
15,500	11,500	8,300	7,000	Subtotal Fixed

Variable Costs

Per User/Month	البند
~5 SAR	Hosting cost per active store
~0.3 SAR (avg 20/store/month = 6 SAR)	WhatsApp/SMS per notification
~10 min/month × labor cost	Support time per store

Marketing

Month 10-12	Month 7-9	Month 4-6	Month 1-3	البند
5,000	5,000	5,000	3,000	Content production
12,000	8,000	3,000	0	Paid acquisition
5,000	3,000	2,000	1,000	Partnerships/Events
22,000	16,000	10,000	4,000	Subtotal Marketing

Total Monthly Burn (Base Case)

Cumulative	Burn/Month	الفترة
45,000	~15,000 SAR	Months 1-3
111,000	~22,000 SAR	Months 4-6
201,000	~30,000 SAR	Months 7-9
321,000	~40,000 SAR	Months 10-12

Year 1 Total Burn (Base): ~321,000 SAR Year 1 Revenue (Base): ~190,000 SAR Net Year 1: -131,000 SAR (250 K-400K SAR initial, runway مريح للسنة الثانية مع استثمار 250K)

One-Time Costs (Year 0) 7.2

البند	التكلفة
Legal setup (شركة، CR، IP)	15,000 SAR
Brand identity + Logo	8,000 SAR
Design system + Initial mockups	12,000 SAR
Initial legal docs (Terms، Privacy، DPA)	8,000 SAR
Salla developer account + testing	1,000 SAR
WhatsApp Business setup + verification	2,000 SAR
المجموع	~46,000 SAR

Capital Required (Base Case) 7.3

Year 1 Burn: ~321,000 SAR
One-time costs: ~46,000 SAR
Buffer (15%): ~55,000 SAR

Initial Capital Needed: ~420,000 SAR

(بـ SAR يمكن تخفيض لـ ~250,000):
- founder salaries مؤجلة لـ 6 شهر
- marketing budget مخفض في النصف الأول
- co-founder hire بدلاً من أول)

Customer Acquisition Strategy .8

8.1 القنوات بالتفصيل

Channel 1: Salla App Store (الأهم — 50% acquisition)

Strategy:

- اطلق على Salla App Store في Month 4 (بعد closed beta)
- - Optimize listing بـ:
 - Title عربي + English
 - 5+ screenshots (mobile + desktop dashboard)
 - 60-second demo video
 - Description keywords غني بـ (Customer Intent, Hesitation, Insights, Why)
 - 3 use cases مفصلة
- اطلب من beta merchants تقييمات في أول أسبوع launch
- اهدف Top 10 في فئة Marketing/Analytics في الأشهر الأولى

Tactics:

- New features شهر كل → keeps listing fresh
- Respond لكل review (positive + negative)
- Salla App Store editorial pitch (لـ "App of the Month")

Cost: 0 من قريب (إذا organic ranking قوي) **Time to first install:** Salla الأسبوع الأول من إطلاق

Expected: 5-15 trial sign-ups/شهر بحلول/50+ نمو لـ 3 شهور، Month 12 شهر في أول 3 شهور،

Channel 2: Content Marketing (25% acquisition)

المحتوى الأساسي:

1. باللغة العربية (أو مماثل smartsnippet.sa/insights) **Blog/Hub site**
 - "كيف تعرف ليش زوار متجرك ما اشتروا؟"
 - "5 أسباب شائعة لتردد العميل في متاجر التجميل"
 - "كيف تحول بيانات التردد إلى مبيعات: Product Doctor"
 - "دليل قياس CVR لمتاجر سلة"
 - "بـ 22% في 60 يوم CVR رفع [X] متجر: Case Study"
2. **LinkedIn (Founder-led):**
 - Posts أسبوعية عن: market insights, Salla ecosystem, personal journey
 - Engagement مع Salla ecosystem people
 - Series: "أرقام من سوق متاجر سلة" (weekly data point)
3. **Twitter/X (Arabic ecommerce community):**

- Threads عن: e-commerce trends, Salla feature deep dives ○
- Mentions/retweets من Salla team ○

YouTube (Quarterly videos): .4

- "5-min Product Tour" ○
- "Case Studies" ○
- "Salla App Store Reviews" ○

KPIs:

- Blog traffic: 5,000 monthly visits by Month 12 ●
- LinkedIn followers: 2,000 by Month 12 ●
- Newsletter list: 1,000 subscribers ●
- Content-attributed signups: 5-20/شهر ●

Channel 3: Direct Outreach (15%)

Targets:

- Top 200 Salla merchants in Beauty/Perfumes/Fashion (manual list) ●
- Founders/Marketing leads identified via LinkedIn ●

Process:

- Personalized email/LinkedIn message: .1
- Reference their store specifically ○
- Mention 1-2 observations عن صفحاتهم ○
- free audit (sample insights) عرض ○
- Demo call (15 min) → trial start .2
- Founder follow-up خلال trial .3
- Conversion conversation Day 12 .4

Goal: 30-50 outreach/15-8 شهر, % conversion to demo, 25-30% demo to trial, 25-35% trial to paid = 2-4 paid customers/شهر from outreach

Channel 4: Partnerships (5-10%)

Partner Types:

A) Salla Certified Agencies (top priority):

- 10-15 agency in Saudi serve Salla merchants
- Offer: 25% recurring commission for referrals (lifetime)
- Co-marketing opportunities (webinar, case study)

B) Complementary App Developers:

- Reviews apps, Accounting apps, Shipping apps
- Cross-promotion in newsletters
- Bundle offers (Year 2)

C) Salla itself:

- Apply for Salla Champions program (if exists)
- Pitch for inclusion in Salla onboarding emails for new merchants in target verticals
- Salla App Store editorial features

Channel 5: Paid Ads (5% — only Year 1 H2)

لا تنفق على paid ads قبل Month 4-6. Reason: نحتاج conversion rate موثوق قبل CAC investment.
عندما نبدأ:

- Meta Ads مستهدفة: Saudi business owners, interests in Salla/e-commerce
- LinkedIn Sponsored Content لـ B2B angle
- Budget: 3,000-12,000 SAR/شهر، يصدق إذا CAC <300 SAR

Funnel & Conversion Targets 8.2

Awareness: 10,000 visitors/month by Month 12
↓ 5% click to trial signup
Trial Signups: 500/month by Month 12
↓ 80% activate first widget
Activated: 400/month
↓ 60% reach 10+ submissions
Engaged: 240/month
↓ 15% convert to paid
Paid Customers: 60/month new acquisitions (Month 12)
↓ 70% retain past Month 1
↓ 50% retain past Month 6

Net retained Month 12: ~30-40 new + churned cohorts

Customer Scenarios (Detailed) .9

Scenario 1: Sara — Beauty Store First-Timer 🌸 (ال ICP الكلاسيكي)

Profile:

- اسم: Sara Al-Otaibi
- العمر: 32
- المتجر: BeautyHub.sa
- ال Vertical: مستحضرات تجميل + skincare
- الزيارات: 15,000/شهر
- المنتجات: SKU 200
- الإيرادات: ~SAR 80,000/شهر
- الإنفاق على الإعلانات: SAR 25,000/شهر

Pain Points:

- تشعر أنه ممكن أعلى — CVR 2.5%
- مزدحمة، صعب تنظيم WhatsApp messages
- لا تعرف أي منتج يحتاج تحسين

- ينفد مخزون ألوان معينة بسرعة، أخرى تبقى dead stock

Journey:

Day 0 (Discovery):

- تشاهد Smart Snippet System في Salla App Store تحت "Featured Apps"
- تقرأ description: "أعرف ليش زوارك ما اشتروا"
- النص يحرك pain point مباشرة
- تنقر "Install" + تقرأ المراجعات (4.8★ من 23 review)

Day 1 (Onboarding):

- 5-minute setup
- تختار "Beauty / Cosmetics": vertical
- التطبيق يفعل widgets pre-filled بـ:
- "تضمن "محتارة في المكونات", "بشرتي حساسة Hesitation reasons
- اللون Variant alerts default
- تخصصها قليلاً (تضيف "أنتظر عرض / خصم")
- تفعل أول widget

Day 3 (First Insights):

- Email notification: "submissions وصل لك 12"
- تفتح dashboard
- Top reason: "محتارة في الاستخدام" (5 submissions)
- لم تتوقع هذا السبب — "shock moment"
- تكتشف 3 منتجات بـ submissions

Day 7 (First Doctor Recommendation):

- Doctor card في Dashboard:
- "عملاء قالوا 'محتارة في الاستخدام Vitamin C Serum: 8"
- "أضف فيديو شرح 30 ثانية": Recommendation
- Apply button → opens helpful template
- تنشره على المنتج + reel تسجل فيديو Sara
- "سنرى التأثير في 7 أيام — Applied": status يضع Doctor

Day 14 (Trial Decision):

- Email: "Your trial ends in 24 hours" •
- Dashboard summary: •
- 42 submissions ○
- 18 interest signals ○
- 1 recommendation applied ○
- Saw clarity score improve for the serum ○
- Trial-to-paid decision: **YES** •
- Selects Growth plan (199 SAR/month) •
- Sets monthly auto-renew •

Day 30 (Established Use):

- Weekly digest يصلها صباح الإثنين •
- تطبق 3-2 recommendations/أسبوع •
- اشعار 12: "WhatsApp: عميل ينتظر Niacinamide Serum بسعر 199 (الحالي 249)" •
- revenue lift → bundle بدل خصم •

Day 90 (Advocacy):

- CVR 3.1 → 2.5% (+24% relative) •
- شكر على LinkedIn (شركة Salla تتفاعل) •
- تذكر اسم Smart Snippet في مجموعة WhatsApp تجار سلة •

Annual Value:

- 199 SAR × 12 = 2,388 SAR/سنة •
- Probable upgrade to Pro in Year 2: 349 × 12 = 4,188 SAR •
- NPS: 9/10 •
- Likely referral: 1-2 merchants/سنة •

Lessons:

- أساسية defaults-specific-Vertical •
- Day 1-3 يجب يكون في "aha moment" •
- Apply button must be one-click •

Scenario 2: Mohammed — Fashion Growing Store 🛍️

Profile:

- اسم: Mohammed Al-Qahtani
- العمر: 38
- المتجر: ModaLuxe.sa
- ال: Vertical: أزياء نسائية
- الزيارات: 28,000/شهر
- المنتجات: SKU 450
- الإيرادات: SAR 180,000~ /شهر
- الإنفاق على الإعلانات: SAR 45,000 /شهر

Pain Points (مختلف عن Sara):

- (منتج 10 variant ألوان × 5 مقاسات = 50) كثيرة Variants
- يخسر فلوس على mistakes في reorder
- يدوي يحسب أي variant مطلوب
- مرشانت متقدم — يبحث عن "advanced tools"

Why he'll buy:

- النقطة الأكبر لديه: Variant Interest Capture
- يدفع لـ data-driven inventory decisions

Journey:

Day 0 (Discovery):

- Founder LinkedIn outreach (direct):
 - الفساتين. لاحظت 6 منتجات collection معجب بـ — ModaLuxe شفت متحركم، Mohammed،
يبيعوا قبل variant يسأل العملاء أي tool معينة. عاملين colors في 'Out of Stock' tagged
reorder؟"
- Mohammed reply: "تكلم معي"

15-min demo call •

Day 1 (Onboarding):

- يفعل Variant & Price Interest first (مشى Hesitation) •
- Customizes for Fashion: colors + sizes prominently •
- Adds custom reasons ل Hesitation (مقاسات، توقعات وصول) •

Day 7:

- 80 interest signals تجمعت •
- Heatmap shows: •
- Black size L: 22 alerts ○
- Red size M: 18 alerts ○
- Beige size S: 12 alerts ○
- Mohammed قرر إعادة ترتيب البيانات بناءً على •

Day 30:

- Bundle creation: "Collection + free shipping" أحدث لـ followers مخصصة •
- Convert rate 35% (excellent) •
- Mohammed upgrades to **Pro plan** (349 SAR/month) •
- Requests: "Multi-store support" (يخطط ل توسع) •

Annual Value:

- $349 \text{ SAR} \times 12 = 4,188 \text{ SAR/سنة}$ •
- High-value advocate •
- Provides product feedback that shapes roadmap •

Scenario 3: Hala — Perfume Established Store 🌹

Profile:

- اسم: Hala Al-Sabah •
- العمر: 45 •

- المتجر: AlOudHouse.sa
- الـ Vertical: عطور (شرقي + غربي)
- الزيارات: 50,000/شهر
- المنتجات: SKU 800
- الإيرادات: ~SAR 350,000/شهر
- متجر established منذ 5 سنوات

Pain Points:

- هل المنتج أصلي؟ — مستمر
- Trust questions: هل العطور الفاخرة
- Pricing concerns
- WhatsApp inbox مزدحم بأسئلة متكررة

Journey:

Day 0:

- يكتشف من Salla App Store
- معرض روي مع Pro tier من البداية

Day 14 (Trial):

- واضح pattern يظهر Hesitation widget
 - 40% من submissions تشمل كلمة "أصلي" أو "تقليد"
 - مع free text صريح: "أخاف يكون تقليد"
- Doctor recommendation: "Trust signal needed — add authenticity badge + warranty section"

Day 21:

- Hala applies Doctor recommendation
 - ينشر Trust snippet جاهز
 - بعد 7 أيام: "trust concerns" انخفضت من 40% → 12%
- Conversion improved noticeably

Day 30:

- Subscribes to Pro plan

- "هذا أهم tool نزلته هذه السنة"

Refers 3 perfume merchants in WhatsApp group

Annual Value:

349 SAR × 12 = 4,188 SAR

3 referrals × 199 SAR × 12 = ~7,200 SAR indirect

Total: ~11,388 SAR cohort value

Scenario 4: Ali — Failed Onboarding (Out of ICP) ❌

Profile:

- اسم: Ali Al-Saeed
- المتجر: GiftBox.sa
- الزيارات: 800/شهر (تحت ICP threshold)
- المنتجات: SKU 50

Journey:

Day 0:

Installs via curiosity (no targeted acquisition)

Day 7:

- فقط 4 submissions في أسبوع
- Dashboard ضعيفة insights، مفرغ
- يعتقد المنتج "لا يشتغل"

Day 14:

- لم يفعل second widget
- لا يحول — Trial ends

Lessons:

Onboarding should check store size مبكرًا

- لو store < 1,000 visits/month → نرفض/نخضم expectations:

○ "متجرك حالياً traffic منخفض — يفضل تجمع 3 شهور بيانات قبل ما تستخدم Smart Snippet"

- بدلاً من خسارة trial، نقدم "wait & watch" mode free

Action Items:

- Build store-size detection في onboarding
- Send specific email: "أكثر — احفظنا traffic متجرك يحتاج"
- Re-engage عند نمو email عبر traffic

Scenario 5: Khaled — Churn Scenario ⚠️

Profile:

- اسم: Khaled Mansour
- المتجر: TechAccessories.sa
- الزيارات: 12,000/شهر
- Vertical: إكسسوارات إلكترونية (out of primary ICP — accessories vertical)

Journey:

Day 0-30:

- Installs, sets up Hesitation widget
- في أول شهر 60 submissions
- Subscribes Starter plan (99 SAR)

Day 60:

- Top reasons: "السعر"، "compatibility uncertain"
- Doctor recommends actions
- **Khaled لم يطبق أي recommendation**

Day 90:

- (لم يحدث محتواه widget الـ) نازل Submission rate
- خلال 3 أسابيع Dashboard لم يفتح Khaled
- في آخر 4 أسابيع 1 open Email engagement:

Day 120 (Churn):

Cancels subscription

Exit survey: "ما شفت قيمة كافية"

What went wrong:

1. لم نتدخل عند drop في engagement

2. ال verticals غير الأساسية تحتاج Doctor rules مختلفة

3. category "Tech Accessories" needs custom recommendations ال

Mitigation Actions:

Build "engagement watch" alert: إذا dashboard open <2x/شهر، email check-in

Quarterly Doctor rule reviews لكل vertical

Onboarding شو يهمه أكثر + category specifically يسأل عن

Quick "win" (Doctor applied + measurable result) مطلوبة في أول 30 يوم

Recovery Attempt:

Email Day 130: "نلاحظ أنك ألغيت — هل نعرف ليش؟"

Free month if reactivate

Win-back rate target: 10%

Scenario 6: Agency Partner (Indirect) 🤝

Profile:

اسم: Ahmed (founder of MarketingAgency.sa)

يخدم: Salla merchants 25

Vertical mix: variety

Journey:

Day 0:

Founder outreach في LinkedIn

Demo شامل + partnership terms

Day 7:

Ahmed integrates Smart Snippet في her service offering

"Now we offer Customer Intent Analytics as part of our growth package"

Day 30:

8 of her clients install Smart Snippet (via her referral code)

25% recurring commission على كل client

Average: $5 \times 199 \times 0.25 = 249$ SAR/شهر revenue stream

Year 1 Value:

8 paid clients = $8 \times 199 \times 12 = 19,104$ SAR ARR for us

Agency commission: 4,776 SAR

Net ARR from this partner: ~14,300 SAR

Business Scenarios .10

Best Case Year 1 — The "Hockey Stick" Scenario 10.1

ما يحدث:

Salla App Store لنا app يفتersh لنا "Featured"

3 case studies viral في ال ecommerce community

شراكة مع 2 Salla Agencies في Month 4

Influencer (Salla Champion) يستخدمها ويوصي

Numbers:

500 paid customers EOY1

92,500 SAR MRR

~480K SAR Year 1 revenue

Break-even Month 11

Net profit Year 1: ~120K SAR

What it requires:

- Product quality (>4.7★ rating) •
- Speed in iteration (weekly product updates Month 1-6) •
- Founder presence in Salla ecosystem •
- Quick بيع response (<2 hour business hours) •

Base Case — The "Healthy Growth" Scenario 10.2

ما يحدث:

- Salla App Store organic + content marketing يعمل •
- 1 strong case study مؤثر •
- Salla ecosystem presence نمو متوسط في •

Numbers:

- 200 paid customers EOY1 •
- 35,000 SAR MRR •
- ~190K SAR Year 1 revenue •
- Break-even Month 18 •
- Need ~150K SAR additional funding for Year 2 •

What it requires:

- Steady product development •
- Founder-led sales في الأشهر الأولى •
- 30% trial-to-paid conversion (وراء industry avg) •

Worst Case — The "Pivot or Die" Scenario 10.3

ما يحدث:

- Submission rate يكون >2% بشكل مستمر •
- Doctor recommendations لا تدفع لل retention •
- Salla ميزة مشابهة (low probability لكن possible) •
- منافس يدخل سلة (probability medium) •

Numbers:

50 paid customers EOY1

7,000 SAR MRR

40K SAR Year 1 revenue

Burn rate exceeds revenue significantly

Need كبير additional funding

Decision Tree:

Month 6 Check:

- |— Submission rate $\geq 3\%$ AND paid ≥ 30 AND retention $\geq 60\%$
 - |— Continue investing
- |— Submission rate 1.5-3% AND paid 15-30 AND retention 40-60%
 - |— Iterate product (UX, Doctor rules)
 - |— Reassess Month 9
- |— Submission rate $< 1.5\%$ OR paid < 15 OR retention $< 40\%$
 - |— 🚫 Kill or Pivot
 - |— Pivot Option 1: Pivot to consulting (data analyses سيرفس)
 - |— Pivot Option 2: Sell as feature to Salla agency
 - |— Pivot Option 3: Wind down, return remaining capital

Operational Scenarios 10.4 (الأمر غير المتوقع)

Scenario A: Salla Launches Competing Feature

Probability: Medium (Year 2) **Impact:** High

Response:

1. Build moat ASAP (Doctor depth, Multi-Variant intelligence)
2. Pitch Salla on partnership BEFORE competition
3. Reposition: "نحن المختصون — Salla نكمل"
4. Focus on niche vertical (Beauty) where Salla won't have depth
5. Expand to other GCC platforms (Zid في الإمارات)

Scenario B: Major Salla Theme Update Breaks Widgets

Probability: Medium (Year 1) **Impact:** High (production)

Response:

Have monitoring + alerts (canary stores)	.1
Hotfix process (<4 hours response)	.2
Salla developer relations contact مفعّل	.3
Compensation policy for affected merchants (1 month free)	.4

Scenario C: PDPL Audit / Compliance Issue

Probability: Low **Impact:** Critical (legal risk)

Response:

Legal counsel on retainer (Saudi-based)	.1
Annual compliance review	.2
Documented audit trail for all data operations	.3
Immediate response team if SDAIA inquiry	.4

Scenario D: WhatsApp Business API Restrictions

Probability: Medium **Impact:** Medium

Response:

Have fallback channels (SMS, email) wired	.1
Pre-approved templates	.2
Multiple BSP options (Wati, Twilio, MessageBird)	.3
Monitor template approval rates	.4

Scenario E: One Founder Leaves

Probability: Low-Medium **Impact:** Critical

Mitigation:

Shareholder agreement with vesting (4-year cliff)	.1
Documented processes (no single point of knowledge)	.2
Strong second-in-command early	.3
Open communication on alignment	.4

Growth Scenarios (Beyond Year 1) 10.5

Path A: Vertical Expansion (Most Likely)

- Year 2: Expand to Fashion + Gifts (full templates) •
- Year 3: Cover all major Salla verticals •
- Year 4: Cross-sell to Zid (UAE) •
- Year 5: Regional expansion (Egypt - Salla expansion) •

Path B: Product Suite Expansion (Sister Products)

- Year 2: Launch Gift Commerce App (Modules 15+16) •
- Year 3: Launch Helpdesk for Salla (Module 6) •
- Year 4: Multi-app product family •

Path C: Acquisition / Exit

- Year 3-5: Salla acquisition target (proven category leader) •
- Year 5-7: PE acquisition (regional ecommerce SaaS roll-up) •

Sales & Marketing Plan (90 Days) .11

Month 1: Foundation

Marketing:

- Launch website (smartsnippet.sa) •
- 4 blog posts (Arabic SEO): •
 - "كيف تعرف ليش زوار متجرك ما اشتروا" ○
 - "مهمة لمتاجر سلة (وما يجب أن تكون فيها) 5 metrics" ○
 - "المفهوم الذي يغيّر علاقة المرشانت بالبيانات: Customer Intent" ○
 - "ما الفرق؟ PopupSnap vs Customer Intent Layer" ○
- LinkedIn personal profile optimization (founder) •

Twitter/X account setup + 10 follows في Salla ecosystem

•

Sales:

Identify 200 target merchants (manual list)

•

Founder begins outreach (5/day = 100/month)

•

Track in simple CRM (Notion or Pipedrive trial)

•

Product:

Closed beta (3-5 merchants)

•

Daily check-ins. bug fixes

•

Month 2: Iteration

Marketing:

4 more blog posts

•

First case study draft (with beta merchant)

•

Newsletter signup CTA

•

Submit to Salla App Store

•

Sales:

Continue outreach

•

First 5-10 trial conversions from beta + outreach

•

Build referral kit (template for happy customers)

•

Product:

Open beta (20-30 merchants)

•

Refine onboarding based on feedback

•

Month 3: Public Launch

Marketing:

Public launch announcement (LinkedIn + Twitter + email)

•

First case study published

•

- Pitch Salla "App of the Month" •
- 60-second video tour •
- 4 more blog posts •

Sales:

- Salla App Store visible •
- Trial signups from App Store •
- Convert 15-25 paid customers Month 3 •

Product:

- Salla App Store submitted (Month 12 week 15) •
- Iteration based on real users •

Content Calendar (Sample — Month 1-3)

Week 1: Blog "كيف تعرف ليش زوار متجرك ما اشتروا" + LinkedIn launch **Week 2:** LinkedIn post: market insight (e-commerce CVR في السعودية) **Week 3:** Blog "5 metrics مهمة" + Twitter thread **Week 4:** Case study draft (beta merchant) **Week 5:** Blog "PopupSnap vs Customer Intent Layer" + LinkedIn series **Week 6:** Founder LinkedIn post: "5 ما تعلمته من beta merchants" **Week 7:** Video tour preview على LinkedIn **Week 8:** Blog "Customer Intent" deep dive **Week 9:** Salla App Store launch announcement **Week 10:** First case study published + share في communities **Week 11:** Webinar/Live Q&A (Twitter Spaces) **Week 12:** Year 1 vision post + roadmap teaser

Sales Scripts & Conversation Scenarios .12

Outreach Email Template (Direct) 12.1

Subject: Quick observation about [Store Name]'s product pages

Body:

[Name]، السلام عليكم

[specific positive observation] معجب بـ [Store URL] شفت متجركم category]. عن منتج أو

لاحظت 3 أشياء:

- [observation 1 – specific]
- [observation 2 – specific]
- [observation 3 – specific]

يخبركم ليش الزوار يغادرون بدون شراء، على tool سؤال: هل تستخدمون مستوى كل منتج؟

لمتاجر سلة Customer Intent طبقة – Smart Snippet System نحن نطلق ويعطيك توصيات قابلة، dashboard يلتقط أسباب التردد، يجمعها في للتطبيق.

سريع؟ أعتقد بتحبون demo هل عندكم 15 دقيقة هذا الأسبوع للـ ما سترون.

[Founder Name]

[Phone]

[Calendar link]

Why it works:

Personalization (research يثبت ال) حقيقي

Pain point مباشر (Customer Intent)

CTA واضح (15-min demo)

No spam vibes

-
-
-
-

Demo Call Script (15 Minutes) 12.2

Minute 0-2: Warm-up

"كيف حالك [Name]؟ شكرًا للوقت."

"قبل ما أبدأ، شاركني لو سمحت — أكبر تحدي حاليًا في متجركم؟"

(Listen carefully — adapt rest of demo to their answer)

-
-
-

Minute 2-8: Demo

Open dashboard demo على متجر (not their store yet)

"هذا ما يحصل عادة في متجر سلة..."

-
-

Walk through 3 features:

Hesitation Capture widget (live demo)

Variant Interest example (real data)

Product Doctor recommendation

• "تلاحظ شو الفرق عن popup tool؟ نحن نلتقط، نحلل، نوصي."

Minute 8-12: Their Store

• "خلني أفتح متجركم — هذا اللي ممكن نلتقطه..."

Quickly inspect their PDP, point to opportunities:

○ "هنا — لو زائر تردد على هذا اللون، نسأله ليش"

○ "هذا المنتج، variant 50 — ممكن نعرف أيش ال variants المطلوبة"

Minute 12-14: Trial Offer

• "نحن نقدم 14-day free trial. بدون credit card."

"Want to try it on your store?"

(Yes → setup install)

(No / hesitant → "What would change your mind?")

Minute 14-15: Close

• "ممتاز — سأرسل لك install link و quick start guide."

• "بنتابع معك يوم 3 لو حابب نتأكد كل شيء شغال."

"Other questions Now?"

Trial-to-Paid Conversion Email (Day 12) 12.3

Subject: insights هل تريدون استمرار ال — X insights متجركم جمع

Body:

، [Name] السلام عليكم

:جمع لكم Smart Snippet System، في آخر 12 يوم

✓ [X] submissions

✓ [Y] interest signals

✓ [Z] Doctor recommendations

insight: [pull specific insight from their data] أبرز

insights: ترايل ينتهي بعد يومين. لمواصلة الـ

💎 Starter – 99 SAR/شهر (K visits المتاجر >3)

🚀 Growth – 199 SAR/(الأكثر شعبية) شهر

🌟 Pro – 349 SAR/(للمتاجر المتقدمة) شهر

[Calendly]: أو إذا تحبون نتكلم قبل القرار، احجزوا 10 دقائق معي

[Founder]

Objection Handling 12.4

Objection 1: "السعر مرتفع"

Response: أفهم النقطة. تعالى نحسب بسرعة:

- متجركم ينفق SAR 25,000/شهر إعلانات
- إذا Smart Snippet رفع CVR من 2.5% إلى 2.75% فقط (= 10% تحسين)
- على نفس الـ traffic، يعني SAR 6,250+ شهر revenue إضافية
- خطة Growth 199 SAR — يعني 31x return

هذا base case. عملاؤنا الحاليين شاهدوا +15-25% في CVR.

Objection 2: "أنا مش متأكد العملاء سيتفاعلون"

Response: حوالي 3.2% submission rate يحصلون [your vertical] شرعي قلق. عملاؤنا في الـ "يعني من 1,000 زائر، 32 يجاوبون

الـ 14 trial يوم بدون credit card — لو لم يتفاعل عملاؤكم، ما تدفعون شيء.

نحن نعطيكم data خلال 7 أيام لتقررنا.

Objection 3: "أعندي PopupSnap بالفعل"

Response: نحن منتج مختلف تمامًا. popups. أداة جيدة لـ PopupSnap — ممتاز

PopupSnap = display tool (يعرض عروض) Smart Snippet = capture tool (يفهم نية العميل)

كثير من عملائنا يستخدمون الاثنين معًا. PopupSnap لـ promotions، نحن لـ insights.

Want me to show you the difference?"

Objection 4: "أحتاج وقت أفكر"

Response: تمام — أفهم. السؤال: شو محتاجين لتقرروا؟

(Listen for specific concern)

إذا الموضوع تجربة فعلية: ابدأوا الـ 14 trial. يوم. لو ما عجبكم، ما تدفعون أبدًا.

Objection 5: "متجري صغير، لا أحتاج هذا حالياً"

Response (HONEST): "كم زيارة شهريًا تقريبًا؟"

insights يحتاج +2,000 زيارة شهرية لتعطي Smart Snippet. صراحة — متجركم لسه صغير (If <2,000)

"يصل لذلك المستوى، نحن جاهزين traffic لما free، موثوقة. أنصحكم تفعلوا حسابكم

بـ 0.3% CVR مفيد لمتاجر بهذا الحجم — الفرق هو أنه يساعدكم تنمو أسرع. نمو Smart Snippet (If 2,000+)

"يساوي عدة أضعاف الاشتراك

Churn Win-Back Script 12.5

Subject: نلاحظ ألغيتكم — هل نعرف ليش؟

Body:

[Name]، السلام عليكم

شيء حصل؟ Smart Snippet. شغنا ألغيتم اشتراك

:لو عندكم دقيقتين، فيدونا cancellation. نتعلم من كل

- شو السبب الرئيسي؟ (السعر / القيمة / التقنية / غيره)

- شو كان ممكن نسوي مختلف؟

نقدّم لكم 30 يوم مجاني لو حابين تعاودون، feedback كرمز شكر على
(Doctor rules new + Variant) المحاولة. شيء جديد طلّعنا في الفترة الأخيرة
heatmap (تحسّن).

[Reply to me / Reactivate]

.شكراً لكم — حتى لو ما عدتم، بنتعلم منكم

[Founder]

Operations & Support .13

Support Model 13.1

Tiers:

Tier 1 — Self-Service (80% of issues)

Help center (Arabic + English)

FAQ pages

Video tutorials

In-app tooltips

Tier 2 — Standard Support (Starter + Growth plans)

Email support (support@smartsnippet.sa)

Response: 24 ساعة workdays

6-day workweek (Saturday-Thursday in Saudi)

Tier 3 — Priority Support (Pro plan)

- WhatsApp Business support •
- Response: 4 ساعة business hours •
- Quarterly review call مع founder •

Support Tools 13.2

- Help center:** GitBook أو Notion-based •
- Ticketing:** Crisp أو Intercom (Arabic support) •
- WhatsApp Business:** ٧ Pro support •
- Internal:** Slack/Discord ٧ team •

Support Metrics & SLAs 13.3

Target	Metric
<24 hours	First response time (Starter)
<4 hours	First response time (Pro)
<2 days	Resolution time (avg)
>4.5/5	CSAT score
<15/month	Tickets per 100 merchants

Customer Success Activities 13.4

Onboarding:

- Day 1: Welcome email + setup video •
- Day 3: Check-in email "كل شيء تمام؟" •
- Day 7: First insights digest •
- Day 13: Trial ending — conversion offer •

Ongoing:

- Monday: Weekly digest email •
- Monthly: "Your store this month" report •

Quarterly: Roadmap update + feature request invite •

At-Risk Customers (drop in engagement):

Auto-detect: dashboard not opened in 14+ days •

Email trigger: "مؤخرًا — كل شيء تمام؟ dashboard نلاحظ ما فتحت" •

Followed by phone call (Pro tier) •

Team & Hiring Plan .14

Founding Team (Required) 14.1

Founder #1 — Product / Engineering Lead

Full-stack developer •

TypeScript expertise •

Salla ecosystem familiarity (or learning fast) •

Owns: product roadmap, tech decisions, codebase •

Founder #2 — Business / Sales Lead

Saudi/Gulf market knowledge •

Sales background (B2B SaaS preferred) •

Arabic native, English fluent •

Owns: customer acquisition, marketing, operations •

Compensation Year 1:

Minimal salary (5,000-10,000 SAR/month) •

Equity-heavy •

Bootstrapped OR seed funded •

Month Hiring Plan-12 14.2

Month 1-3: Founders Only

- Stay lean •
- Focus on product + first 50 customers •
- All roles bridged by founders •

Month 4-6 (First Hire): Customer Success Manager

- Saudi-based •
- Arabic + English •
- Tech-comfortable •
- Salary: 8,000-12,000 SAR/month •
- Owns: support tickets, onboarding, content •

Month 7-9 (Second Hire): Junior Developer

- Frontend or full-stack •
- React/TypeScript •
- Salary: 10,000-15,000 SAR/month •
- Helps Founder #1 scale •

Month 10-12 (Third Hire): Marketing/Content Specialist

- Arabic content creator •
- SEO + social media •
- Salary: 7,000-10,000 SAR/month •
- Owns: blog, LinkedIn, newsletter •

Outsourcing Strategy 14.3

Outsource (Don't Hire For):

- Design (use freelance Figma designer hourly) •
- Legal (retainer with law firm) •

- Accounting (Tilad أو similar Saudi accounting platform) •
- Customer onboarding videos (one-time freelance) •
- PR (case-by-case) •

Don't Outsource (Hire For):

- Customer success (relationship matters) •
- Core development (IP matters) •
- Sales (founder-led at first) •

Culture Principles 14.4

- Talk to customers weekly** — every team member .1
- Quality over speed** — bad shipped feature damages trust .2
- Arabic-first** — السوق الأساسي عربي .3
- Documented** — موثق process كل قرار + كل .4
- No-discount culture** — value clear .5

Partnerships Strategy .15

Salla Partnership 15.1 (الأهم)

الهدف: أن يصبح Salla App Store featured app + شريك معلن

Stages:

Stage 1 (Months 1-6): Get on Their Radar

- Submit app for review (high quality) •
- Quick response to any Salla developer feedback •
- Engage with Salla developer community (Twitter, Discord if exists) •
- Apply for Salla Champions / Partner Program •
- Founder attends Salla events •

Stage 2 (Months 7-12): Build Mutual Value

- 3 case studies على Salla merchants (Salla can co-promote) •
- Joint webinar with Salla product team •
- Get featured in Salla App Store editorial •
- Apply for "App of the Month" •

Stage 3 (Year 2): Strategic Partner

- Salla onboarding email mentions Smart Snippet for relevant merchants •
- Salla referral program (commission for them) •
- Co-marketing initiatives •
- Eventually: Salla integration deeper (data sharing, joint product) •

Agency Partnerships 15.2

Target: 10-15 Saudi/Gulf marketing agencies serving Salla merchants

Offer:

- 25% recurring commission (lifetime per client they refer) •
- Co-branded onboarding for their clients •
- Quarterly agency partner update calls •
- Dedicated Slack channel for partners •

Initial Approach:

- Founder-led BD calls •
- Identify top 20 agencies •
- Personalize each pitch •
- Goal: 3-5 active partners by Month 12 •

Tool / App Partnerships 15.3

Complementary Salla apps:

- Reviews apps (cross-promotion) •
- Accounting apps (bundle offers Year 2) •
- Shipping apps (data integration potential Year 3) •

International:

- Klaviyo (if they enter Saudi market) — integration potential •
- WhatsApp BSPs — preferred partner status •

Influencer Partnerships 15.4

Type: Salla Champions, prominent merchants

Approach:

- Free Pro account for top 3 Salla content creators •
- Case study collaboration •
- Cross-promotion (their newsletter) •

Legal & Compliance .16

Company Structure 16.1

Recommendation: Saudi LLC (شركة ذات مسؤولية محدودة)

Reasons:

- يخدم سوقك الأساسي •
- ZATCA tax-compliant •
- يمكن قبول استثمار محلي بسهولة •
- Protection على founders •

Alternative: UAE FreeZone (إذا founders not Saudi)

IP Protection 16.2

Trademark:

- Register "Smart Snippet System" أو الاسم النهائي في Saudi Arabia (SAIP) •

- GCC (regional) ○
- WIPO (international, Year 2) ○

Code:

- All in private GitHub repos •
- Contributor agreements for any contractor •
- Open source: clearly defined what's external •

PDPL Compliance (Critical) 16.3

Required Documents:

- Privacy Policy (Arabic + English) — at smartsnippet.sa/privacy .1
- Terms of Service (AR + EN) .2
- Data Processing Agreement (DPA) template for merchants .3
- Cookie Policy .4
- Consent log retention policy (7 years) .5

Operational Requirements:

- Data stored in Saudi Arabia (AWS Riyadh) •
- Consent layer in product (built-in) •
- Data Subject Rights endpoint (customer-facing) •
- Annual compliance review •

Cost:

- Initial legal docs: ~15,000 SAR •
- Annual compliance review: ~5,000 SAR •
- Legal retainer (light): ~3,000 SAR/month •

Tax & VAT 16.4

ZATCA (Zakat, Tax and Customs Authority):

- Register for VAT once revenue $\geq$ 375K SAR/year (likely Year 2) •
- Issue VAT-compliant invoices •

e-invoicing requirements (Fatoora) •

Initially (under threshold):

Simple invoicing OK •

Track expenses meticulously for Year 2 transition •

Salla Terms Compliance 16.5

Required:

Don't misuse Salla data (only for app's purpose) •

Don't compete with Salla core features •

Respect Salla App Store guidelines •

Maintain >95% uptime •

Honor app removal requests •

Contracts to Have 16.6

Customer Agreement (TOS) •

Privacy Policy •

DPA (Data Processing Agreement) •

Refund Policy •

Cookie Policy •

Co-founder Agreement (with vesting) •

Employment contracts (when hiring) •

Contractor agreements (designers, lawyers, etc.) •

NDA template (for partnership conversations) •

Business Risks & Mitigations .17

R1: Salla Platform Dependency (المخاطر الأكبر)

Risk: 100% business يعتمد على Salla **Severity:** Critical **Probability:** Low (قاعدة مستقرة Salla)

Mitigations:

1. Build strong relationship with Salla early
2. Plan Zid (UAE) expansion في Year 2
3. Keep tech stack platform-agnostic (could port to Shopify Year 3+)
4. Diversify revenue (sister products في Salla)

R2: Salla Launches Competing Native Feature

Severity: High **Probability:** Medium (Year 2-3)

Mitigations:

1. Build depth Salla won't replicate (Doctor, Multi-Variant)
2. Become indispensable partner (data Salla wants)
3. Position as complement, not competitor
4. Pivot to other platforms if needed

R3: Slow Customer Adoption

Severity: High **Probability:** Medium

Mitigations:

1. Strong product-market fit verification في beta
2. Strong onboarding (5-min activation)
3. Quick wins (Day 7 first insight)
4. Multi-channel acquisition

R4: High Customer Churn

Severity: High **Probability:** Medium

Mitigations:

Engagement monitoring + intervention	.1
Weekly digest as touchpoint	.2
Doctor recommendations as ongoing value	.3
Quarterly product updates	.4
Annual plan incentive	.5

R5: Regulatory Changes (PDPL Updates)

Severity: Medium **Probability:** Medium

Mitigations:

Legal counsel on retainer	.1
SDAIA news monitoring	.2
Built-in flexibility (consent versioning)	.3
Annual compliance audit	.4

R6: Cash Flow Issues (Pre-Profitability)

Severity: Critical **Probability:** Medium

Mitigations:

18+ months runway from start	.1
Conservative spending Year 1	.2
Annual plans for cash flow	.3
Funding option (seed round if needed)	.4

R7: Founder Burnout / Disagreement

Severity: Critical **Probability:** Low-Medium

Mitigations:

Clear role definition	.1
Vesting + co-founder agreement	.2
Regular communication	.3

Personal sustainability practices .4

R8: Talent / Hiring Difficulty

Severity: Medium **Probability:** Medium

Mitigations:

Strong employer brand (good content)	.1
Equity offerings to attract	.2
Remote-friendly (Saudi + GCC pool)	.3
Internships program (universities)	.4

R9: Currency / Macro

Severity: Low (Saudi market stable) **Probability:** Low

Mitigations:

Saudi Riyal pegged to USD	•
Local market focus = low exposure	•

R10: Reputational (Bad Reviews / Incident)

Severity: High **Probability:** Low-Medium

Mitigations:

Quality bar enforced (no half-baked features)	.1
Quick response to issues	.2
PR/communication plan ready	.3
Customer success focus	.4

Vision & Long-term Roadmap .18

Year Vision-3

"The default Customer Intelligence platform for Salla merchants."

By 2029:

- 1,500+ paid Salla merchants •
- 5M+ SAR ARR •
- Team of 10-15 •
- 4 product lines (Customer Intent, Gift Commerce, Helpdesk, Loyalty) •
- Expanded to Zid (UAE) •
- Salla strategic partner •

Year Vision-5

"The Voice-of-Customer infrastructure for Arabic ecommerce."

By 2031:

- 5,000+ merchants across Salla + Zid + Shopify (Arabic stores) •
- 25M+ SAR ARR •
- Team of 30-50 •
- Acquired by Salla, or PE-funded for further growth •
- Regional brand recognition •

Long-term Possibilities

Acquisition Candidates (Year 3-5):

- Salla (strategic acquirer) •
- Zid (defensive acquirer) •
- Regional e-commerce SaaS roll-up •
- International Customer Intent platforms entering region •

Standalone Path:

- Continue building, raise Series A Year 3 •
 - Expand product lines •
 - Become category leader for Arabic ecommerce •
-

Investment Considerations .19

Funding Options 19.1

Option A: Bootstrap

Pros:

- Full ownership •
- No external pressure •
- Forces discipline •

Cons:

- Slow growth •
- Founder burnout risk •
- Misses Best Case timeline •

Best for: Founders with savings or other income

Option B: Friends & Family

Amount: 100-300K SAR **Equity:** 5-15% **Pros:** Fast, trust-based **Cons:** Personal relationship risk

Option C: Saudi Angel / Pre-Seed

Amount: 250-500K SAR **Equity:** 10-20% **Sources:**

- Saudi angel networks (e.g., Wamda Capital, Hala Ventures) •
- Strategic angels (Salla ecosystem people) •

Pros:

- Network access •
- Strategic value •
- Validation •

Cons:

- Dilution •
- Board pressure •

Option D: Seed Round

Amount: 1-2M SAR **Equity:** 15-25% **Sources:**

- Saudi/GCC VCs (STV, Raed Ventures, IMPACT46) •
- MENA-focused VCs (Wamda, Algebra Ventures) •

Timing: Best after Year 1 with traction

- 100+ paid merchants •
- 25K+ SAR MRR •
- 70%+ retention •

Use of Funds (If Funded) 19.2

500K SAR Pre-Seed Allocation:

- 50% Engineering & Product (250K) — first dev hire, tools •
- 25% Marketing & Sales (125K) — content, ads, events •
- 15% Operations & Legal (75K) — office, legal, insurance •
- 10% Reserve (50K) •

Milestones for Series A 19.3

To justify Series A (Year 2+):

- 500+ paid merchants •
- 100K+ SAR MRR •
- 80%+ retention •

Expansion to 2nd platform (Zid)

•

Team of 8+

•

Appendix: Financial Assumptions .20

Key Assumptions Used 20.1

Source/Reasoning	Value	Assumption
Industry estimate	50,000	Salla active merchants
Salla announcements	30%/year	Salla growth rate
Vertical + size filters	30% of all merchants	ICP penetration
SaaS industry avg	15%	Trial-to-paid (Base)
Healthy SaaS benchmark	70%	30-day retention (Base)
Plan mix calculation	175 SAR/month	ARPU
SaaS standard	85%	Gross margin
Salla App Store + content + outreach	150 SAR (blended)	CAC
Based on 5% monthly churn	20 months	Average lifetime

Sensitivity Tests 20.2

Pricing sensitivity:

If Starter raised from 99 → 129 SAR: -10% signups, +30% ARPU

•

If Growth lowered from 199 → 149 SAR: +15% signups, -25% ARPU

•

Recommendation: Hold pricing for first 6 months. test after

•

Retention sensitivity:

60% retention vs 70%: LTV drops 25%. still profitable

•

50% retention: LTV / CAC ratio drops to 6:1. still healthy

•

40% retention: kill scenario

•

CAC sensitivity:

Blended CAC 300 SAR vs 150: payback period 2 months instead of 1. still healthy

•

CAC 500 SAR: requires reconsideration of channels

•

Break-Even Analysis 20.3

Base case break-even:

Monthly fixed costs Year 1 average: ~25,000 SAR

•

Required MRR for break-even: $\sim 25,000 / 0.85 = \sim 29,500$ SAR

•

At 175 ARPU: ~170 paid customers

•

Expected: Month 11-13 in Base case

•

Best case break-even:

Faster customer growth = Month 9-10

•

Lower acquisition cost per dollar = better margins

•

Three-Statement Model Overview (Simplified) 20.4

Year 1 (Base Case):

Revenue: 190,000 SAR

COGS (15%): -28,500 SAR

Gross Profit: 161,500 SAR

Operating Expenses:

- Marketing: -85,000 SAR

- Personnel: -120,000 SAR

- Tools/Hosting: -40,000 SAR

- Legal/Admin: -36,000 SAR

- Other: -20,000 SAR

Total OpEx: -301,000 SAR

EBITDA: -139,500 SAR

(Net loss, but expected in Year 1 SaaS)

Cumulative cash burn: -185,000 SAR (after one-time costs)

Year 2 (Base Case):

Revenue:	870,000 SAR
COGS (15%):	-130,500 SAR
Gross Profit:	739,500 SAR
Operating Expenses:	-650,000 SAR
EBITDA:	89,500 SAR  Profitable!

ملخص نهائي

الفرصة في 5 نقاط:

-  **Real gap** — (verified) منافس مباشر في سلة 0 .1
-  **Real WTP** — SmartInsight 693 SAR/شهر يثبت السوق .2
-  **Real market** — 6,000+ متجر ICP في Saudi .3
-  **Real moat** — Salla-native + PDPL + Arabic + Doctor depth .4
-  **Real timing** — 6-12 شهر window المنافسة قبل .5

القرار الاستراتيجي:

Go — **مع شرط:** اتباع MVP discipline (4 features only), vertical focus (Beauty أولاً), kill criteria objective (60-day check).

التزام مالي مقترح:

- Bootstrap if possible** (founders' savings + minimal salary) •
- Or angel/pre-seed 250-400K SAR** for 12-18 month runway •
- Series A after Year 1** if metrics validate •

:Top 3 Actions This Month

- Validate behavioral hypothesis (prototype 2-week test) .1
- Apply for Salla developer account + start integration testing .2

نهاية Business Plan

Build & Launch **Timeline:** 15 weeks to Salla App Store **Capital:** 250-400K SAR  **القرار:**
for healthy runway **Bet:** Customer Intent
يصبح فئة معترف بها في سلة خلال 18 شهر، ونحن
نقودها.
